

Are you drinking too much coffee?

Are you getting enough vitamin D to optimize your fertility?

What about vitamin B12?

NUTRIGENOMI [®]
EAT ACCORDING TO YOUR GENES

GENETIC TEST FOR PERSONALIZED NUTRITION AND FERTILITY

The answer may be in your genes

Research shows that the nutritional status of both women and men can impact fertility. We also know that specific variations in our genes can explain why some of us respond differently from others to the same foods, beverages and supplements we consume.

Learn how your genes can affect:

Fertility

Cardio-metabolic Health

Nutrient Metabolism

Food Intolerances

Eating Habits

Physical Activity

Weight Management
